PROTECTED SEQUENCE / REPRESENTATIVE STILL

1 / A photographic window

The existing loader and handoff remain unchanged. This frame represents the window, not a new loader design.

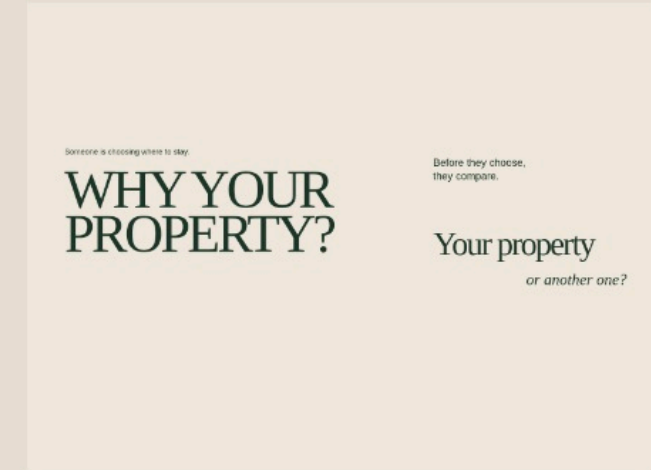

PROPOSED STATIC COMPOSITION

2 / The place arrives

Original image, headline and boundary behavior. One invitation in the cream margin; on mobile it sits below the photograph.

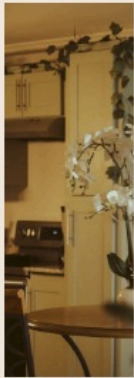

Keep the original commercial question as one brief transition. The photograph returns immediately afterward.

PROPOSED STATIC COMPOSITION

3 / The reason to choose

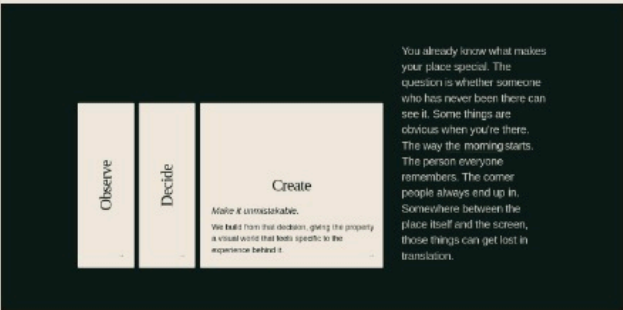

Why your property? Preserve the commercial question, condensed to 560 px desktop / 480 px mobile. No new CTA or selector.

PROPOSED STATIC COMPOSITION

4 / Inhabit the frame

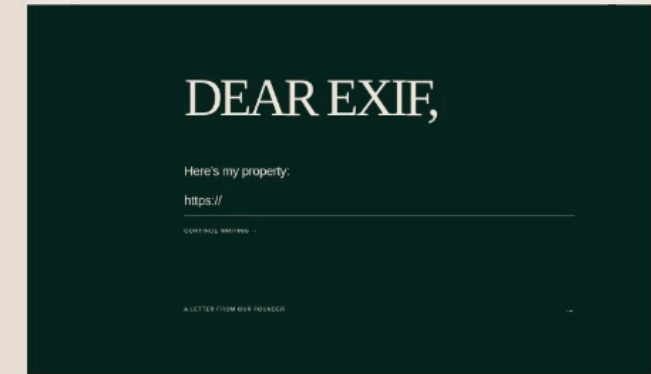

Nine existing images: reflection, orchid, lounge, terrace, guests, table tennis, loungers, golden beach, leaves. Protect gallery mechanics.

PROTECTED COMPONENT / CURRENT STILL

5 / Attention becomes a choice

The original Observe / Decide / Create deck. Keep its spatial selection; add no duplicate exercise.

PROTECTED COMPONENT / CURRENT STILL

6 / A human ending

Dear EXIF stays the quiet coda. No promotional section before it. Navigation and the founder's letter remain protected.

Recommended: A. It keeps the connection between the emotional arrival and an owner's reason to engage EXIF, without retaining the original comparison's long delay. These are storyboard stills; they do not demonstrate new animation or a working page.

B / The uninterrupted arrival

Cut directly from hero to photography. Let the category caption and original cards carry commercial meaning.

3 / A direct photographic cut

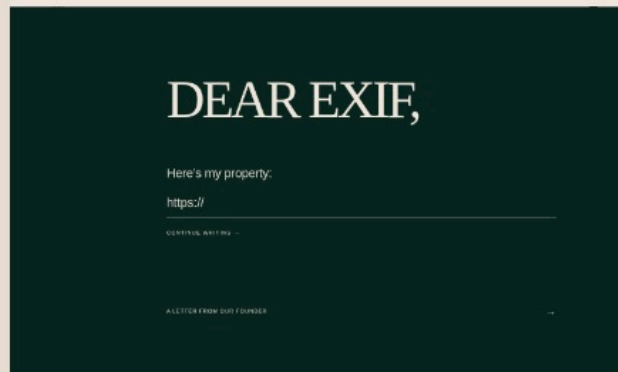

No standalone comparison. This preserves the strongest atmospheric continuity, but the owner's problem is less explicit.

The commercial tradeoff

The category caption and original cards carry relevance. No relocation of the original comparison is assumed.

B is the useful counter-test. It makes the photographic flow stronger, but risks letting the gallery read as a photographer's portfolio before the business question becomes explicit. These are storyboard stills; they do not demonstrate new animation or a working page.

professional experience.

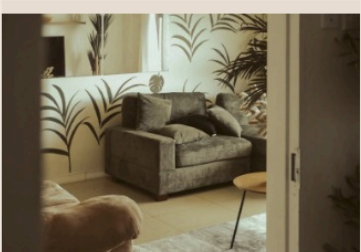

Photography returns fastest. The category caption names the service, but
the owner's choice problem is deferred.

The three columns hold the restored hero, single CTA and proposed gallery edit constant. Only the comparison changes. This montage is a static pacing comparison, not an implemented scrolling page.

The photographic edit.

All existing sources, uncropped and ungraded. Keep nine; reserve four. Green labels identify the proposed sequence.

KEEP / POSITION 3

01 / Lounge

Soft green; reflective depth; a wide pause. Keep third.

KEEP / POSITION 2

02 / Orchid

White flowers lift the dark opening; intimate vertical.

KEEP / POSITION 4

03 / Terrace

Slippers and linen imply use. The hinge toward people.

Light and color

Amber glass → white flowers → soft green → lived terrace → human presence → late light → cool foliage.

Scale and loop

Keep the original full-image frames and size variations. The leaves close quietly; their green and shadow connect back to the opening reflection.

Keep the signs of living.

The slippers and linen are small details. Leaving them in the frame gives an amenity photograph a more inhabited reading.

OBSERVE

What is visible.

Two chairs, a table, a hammock, slippers and an unmade foreground. These are observations from the photograph.

INTERPRET

What it suggests.

A place to pause, rather than an inventory of furnishings. An editorial interpretation, not a verified guest insight.

DECIDE

What stays.

Retain the traces of use. Give them enough space to be noticed. Do not polish away the reason this image feels lived in.

Studio demonstration using existing photography from previous professional experience. Both frames use the same source photograph; this is not a client before/after case.

PHOTO DIRECTION NOTE / 01STUDIO EXERCISE

Make use visible.

Visible material
A terrace, two chairs, a hammock, slippers and linen.

The most useful detail is already in the photograph.

THE QUESTION

Are we showing what the room has, or what it invites someone to do?

THE DIRECTION

Lead with the pause. Preserve the slippers and linen as traces of use. Keep the natural warmth; avoid turning the frame into an amenity checklist.

THE IMAGE BRIEF

Leave room around the chairs. Keep the foreground. Let one short caption support the photograph rather than describe every object.

Editorial hypothesis drawn from the image. Property-specific research would establish whether this interpretation is appropriate.

WHAT THE DIRECTION BECOMES

A place to pause.

A moment of hospitality, held in one frame.

An image brief becomes a photographic hierarchy, a short caption and a page composition. The subject stays larger than the explanation.

From attention
to something usable.

Research establishes what can be supported. Direction chooses what should lead. Implementation carries that choice into an image brief, words and a guest-facing composition.

Authored studio exercise, not a commissioned property case or a claim of research results. Existing photography from previous professional experience. The brief and layout are draft editorial materials created for this review.
